MyVirtuoso HOME

IR Extender for Air Conditioners, heat pumps and stoves

Technical Note P/N 01335-1020-00 - rev. 1, date: 12/11/2021

No more remotes scattered around the house, without even remembering which appliance is combined! With the **IR extender for air conditioners, heat pumps and stoves** you can control everything comfortably from the MyVirtuoso Home ES App. Thanks to its learning function, the controller learns the functions of each remote control, allowing you to replicate them and use your smartphone as a control tool for your new smart home!

The device also includes a temperature sensor for constant monitoring of the environment in which it is installed.

IR Extender for Air Conditioners, heat pumps and stoves

Technical Note P/N 01335-1020-00 - rev. 1, date: 12/11/2021

Features
